DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 2-26 and 51-55 have been considered but are most in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 2-11, 13-15, 17-26, and 55 are rejected under 35 U.S.C. 102(e) as being anticipated by Davies (US5917972). Davies shows in Fig.1 a non-imaging optical waveguide 1 being bound and having a first port 3 and a second port 4, said non-imaging waveguide comprising structure means for efficiently directing all the light entering through said first port around said bend.

Application/Control Number: 08/988,479

Art Unit: 2828

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 12, 16, and 51-54 are rejected under 35 U.S.C. 103(a) as being unpatentable over Davies (US5917972) in view of Hed (US5727108). Davies discloses all limitations of the claims except for a compound parabolic concentrator. Hed teaches a compound parabolic concentrator (CPC) in Fig.1 and 3-8). For the benefit of connecting as an optical connector, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Davies a compound parabolic concentrator as taught by Hed.

Citation of The Pertinent References

The following US patents are being made of record, even though they were not relied upon in this Office action, for being similar in subject matter, and may be relied upon in any future Office Actions: 5708671, 5347530, and 5117431.

Communication Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dung (Michael) T Nguyen whose telephone number is (571) 272-1949. The examiner can normally be reached on 8:30 - 17:00.
